

TASKS TO COMPLETE:

Task 1: From the homepage, navigate to movie and prod a user about a movie.

Task 2: From the homepage, navigate to profile and View and Manage prods from friends

Task 3: From the homepage, navigate to profile and View and Manage current watchlists

Test Subjects:	Patrick Huang	Vincent Carlino
Age:	20	20
Gender	Male	Male
Major	Mechanical Engineer	Computer Science
Education	College Education	College education
Time to complete task 1	1m10s	1m6s
Usability/Intuitiveness from 0-5	4	3
Difficulties Completing Task	None	Prod is confusing
Time to complete task 2	27s	1m2s
Usability/Intuitiveness from 0-5	3	1
Difficulties Completing Task	No button to remove prod	No Delete Button. Chatbox layout of prods confusing and initially did not think that the list of prods were recommendations from friends. Tried to navigate to watchlist to find prods
Time to complete task 3	14s	16s
Usability/Intuitiveness from 0-5	3.5	4
Difficulties Completing Task	Did not recognize delete watchlist movie button.	Red button a little vague
Comments by Subject	Does not understand what prod means. Thought received prods went under watchlist tab instead of Prod tab. Red buttons to delete watchlist movies confusing as user was colorblind	Too much whitespace on webpages. Main focus of prod page is not the movie, but the user.
Feedback from user	Prod is confusing. To Watch movies, when deleted from the To Watch list, should not be deleted completely. Rather, it should be moved to a "Watched" list, or greyed out, to show a history of watched movies	Rather than relying on headers on Prod, Watchlist etc. pages to tell you what information is on the page, it should be intuitive enough to know just by looking. Emphasis should be on the information, provided.
